About Me

Highly skilled and motivated MERN stack developer with a strong foundation in front-end and back-end web development and Data structures and algorithms. Proficient in modern technologies such as React, Node.js, Express and MongoDB. Seeking a challenging and dynamic role where I can utilize my skills and experience to create intuitive and visually appealing web applications.

Projects

Ecommerce ([Github](#))

Dec 2022 - Jan 2023

Key Features :

- Built a fully functional e-commerce platform using the Nodejs, Express, MongoDB, EJS, CSS and Bootstrap with MVC architecture.
- In client side implemented features such as user authentication, product listing, wish list, shopping cart,
- OTP verification, profile management, order tracking and cancellation and Razorpay payment integration.
- In Admin side implemented user management, product management, coupon management, category management, banner management, sales report, graphs. Product single page with image zoom

DevConnect ([Github](#))

Mar 2023 - Present

Key Features :

- Built a fully functional Web app with React and node.
- And use of this Web app is for connecting developers, conducting Tech Events, Writing Articles. etc..
- In admin side admin control users and add communities. And admin has all control like deleting users articles and all.
- In client side users can chat each other and in community section users discuss like group chat with implementing websocket.io.

Mini Projects

Netflix Clone ([Github](#))

Olx Clone ([Github](#))

ToDo List ([Github](#))

Interests

- Coding
